

FEDERICA BALDI, DANIELE CIOFFO

AN APPLICATION EMBEDDING MACHINE
LEARNING ALGORITHMS

APPLICATION HIGHLIGHTS

SoundHabit is an application that **suggests** new songs to users, according to their taste.

It is able to automatically **extract music information** and **classify the songs** into their musical genres.

Songs are analyzed based on their digital signatures for some factors, including tempo, acoustics, energy, danceability etc.

SoundHabit wants to answer the recurring question:

"What kind of music are you into?"

DATASET DESCRIPTION

- **Source:** GTZAN: <http://marsyas.info/downloads/datasets.html>
 - **Description:** A dataset that contains 10x100 songs, 100 songs for each one of the 10 main genres (*blues, classical, country, disco, hip-hop, jazz, metal, pop, reggae, rock*)
 - **Volume:** 1.23 GB
 - Focus on **6 main genres:** *blues, classical, jazz, metal, pop, rock*.
- 

RMS (Root Mean Square)

Zero Crossing Rate

Spectral Rolloff

Spectral Centroid

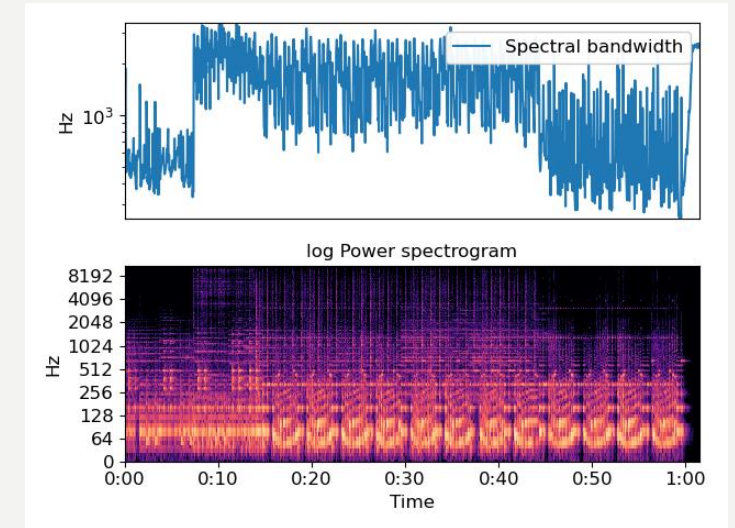

FEATURE EXTRACTION

Chroma Frequencies

Mel-Frequency Cepstral Coefficients

Spectral Bandwidth

FEATURE EXTRACTION

Dimensionality: 26 attributes

DATA TRANSFORMATION

- Removing duplicates
- Normalization (z-score)

MODELS EVALUATION

| Algorithm | Attribute Selection | # Selected Attributes | Accuracy | Avg Precision | Avg Recall | Avg F measure | Tree dimension | Time to build the model |
|-------------|-------------------------------------|-----------------------|----------|---------------|------------|---------------|-----------------|-------------------------|
| J48 | CFSubsetEval + BestFirst (Backward) | 11 | 68.87% | 0.695 | 0.689 | 0.69 | 117 (59 leaves) | 0.02 |
| J48 | InfoGain + Ranking (0.3) | 21 | 69.04% | 0.692 | 0.69 | 0.69 | 119 (69 leaves) | 0.02 |

BROWSING SONGS

The screenshot shows the SoundHabit website interface. On the left, a dropdown menu is open, showing a list of categories: 'Suggested songs' (highlighted), 'Songs liked', 'Song name', 'Song author', 'Blues songs', 'Classical songs', 'Jazz songs', 'Metal songs', 'Pop songs', and 'Rock songs'. A blue arrow points from this menu to the 'Suggested songs' dropdown on the website. The website itself has a search bar at the top with a magnifying glass icon and the word 'Search'. Below the search bar, there are two song recommendations, each in a yellow-bordered box. The first recommendation is for 'I Can't Quit You Baby' by Otis Rush, featuring a red and white album cover. The second recommendation is for 'I'd Rather Go Blind' by Etta James, featuring a yellow and black album cover. Each recommendation includes the song name, author, genre, a link, and a red heart icon.
